Will do. I believe our folks have done the final review on the QASP. I'll get the final version from Michelle and forward it to you. Michelle's time is not listed on the cost estimate. She said that her time along with sample container costs and sample shipment would be charged to Brenda's TDD. I will add a Data Manager and update the Personnel Level's. Thanks,

Jeff:

Could you please list the Personnel Level on the personnel? Also, I did not see a Data Manager listed. I want this information to be included in the flex viewer. Also, we need to get the QASP finalized so that you guys can implement this effort. I think that Brenda was saying like August 6.

I go on vacation this Friday and will not be back to the office until Aug 6.

Thanks

Gary –

Here's the weekly summary information along with a cost estimate for upcoming field activities and report preparation. During the field visit with one of our clearing subcontractors, they suggested using a Swamp Master unit to access the pits. This would eliminate the need to clear a lot of area around the pits. We also decided that the uneven terrain around the pits was going to be a problem for the man lift. Take a look at the estimate and let me know what you think. If it looks ok, David can send out the proper notifications for requesting a TDD amendment.

Thanks,

**Jeff Wright, CHMM**
